

KENSA

Ready for immediate use – no
training required

Speak instead of typing – keep your
hands free on the job

Reliable even with noise, dialects, and
accents

Runs on any device – even offline

Put an end to paperwork: You speak, the app documents.

Digitalization made easy.

A single overlooked error in a report can delay workflows, trigger follow-up questions, and cause unnecessary costs and additional work.

Every day, your qualified specialists lose valuable time documenting via inflexible and process-hindering paper forms instead of concentrating on their value-adding tasks. Paper forms are a burden for both your employees and your company.

This is where KENSA comes in

KENSA replaces paper forms with structured voice input. Your teams record data directly on-site – the app automatically fills in the correct fields. Existing forms (e.g., PDFs) are integrated and ready for immediate use, without requiring process changes or media breaks.

The result:

- Documentation happens in parallel with value-adding activities.
- System-compatible data for direct processing in your downstream systems.

Artificial Intelligence included

KENSA is more than just speech recognition – it is an AI that understands and structures language. Developed by KENBUN IT AG in Karlsruhe, based on years of experience with digital voice systems since 2018. Already successfully in use by numerous users in demanding environments. This expertise is built into KENSA.

How KENSA works

Step 1:

Integrate paper forms into the app

Existing paper inspection reports or PDF forms are integrated into KENSA.

Step 2:

Just speak and the app does the rest!

Employees speak the content into the desired fields, and the app fills them in intelligently.

Step 3:

Process the data

The captured information is available in a structured format for ERP, CRM, maintenance systems, or any other downstream systems of your choice.

Your Benefits

Speak instead of typing
Hands-free on work

Fewer errors
in reports

Works even
with noise,
dialects &
accents

Seamless
transfer to your
systems

Test KENSA now with one of your time-consuming reports

Experience how KENSA makes your documentation processes simpler and more effective!
