

KENSA

Ready to use instantly,
no training needed

Speak instead of type,
hands free on the job

Reliable even with noise,
dialects and accents

Runs on any device,
even offline

Dirty hands, clean documentation – with KENSA.

Sound familiar? You're in the middle of a vehicle inspection. Your hands are oily, the finding is clear – but then comes the moment every inspection engineer knows and hates: gloves off, paper out, write everything down. Or type it into the tablet. Focus gone. Flow interrupted. And at the end of the day, the next task is waiting: transferring everything into the system again.

Inspection engineers carrying out the vehicle and emissions test work under pressure. Vehicle after vehicle, finding after finding. Their real expertise lies in spotting defects – not in typing up notes. Yet a considerable part of the working day goes exactly there: into manual documentation.

KENSA: just speak. Done.

With KENSA, the workflow changes fundamentally. The inspection engineer stays at the vehicle, stays focused – and speaks their findings straight into the KENSA app. No interruption. No gloves taken off. No paper chaos.

KENSA understands, structures and transfers – fully automatically into the system. What used to take several steps now happens in a single one: speaking.

Artificial intelligence included

KENSA is more than speech recognition – an AI that understands and structures language. Developed by KENBUN IT AG in Karlsruhe, built on years of experience with digital voice systems since 2018. Already successfully in use with numerous users in demanding environments. This experience is built into KENSA.

How KENSA works

Step 1: Integrate paper forms into the app

Existing paper or PDF forms are embedded into KENSA.

Step 2: Simply speak and the app does the rest!

Employees speak the content into the desired fields and the app fills them in intelligently.

Step 3: Process data further

The captured information is available in structured form for ERP, CRM or maintenance systems and any other downstream systems of your choice, ready for further processing.

Your benefits

Speak instead of type
Hands free on the job

Fewer errors in reports

Works even with noise, dialect & accent

Seamless handover to your systems

Test KENSA now with one of your existing forms

Discover how KENSA makes your documentation processes simpler and more effective!
