

KENSA

Ready to use instantly,
no training needed

Speak instead of type,
hands free on the job

Reliable even with noise,
dialects and accents

Runs on any device,
even offline

Loud. Hectic. Still precise. – KENSA understands you, whatever is going on around you.

A workshop is not an office. Compressors are running, impact wrenches are rattling, colleagues are shouting across the hall. And this is exactly where speech recognition is supposed to work?

Standard solutions were built for quiet environments. For meeting rooms, home offices, dictation at a desk. Not for the reality of a test engineer or a vehicle technician.

Anyone who speaks with a dialect, who uses technical terms like *brake disc wear*, *tie rod end* or *lambda sensor*, who stands next to a vehicle lift – is left behind by conventional tools.

KENSA was built for your world – not for silence

KENSA is specially trained to work under real working conditions. Background noise in the workshop? No problem. Bavarian dialect, Berlin slang or a Swiss accent? KENSA understands. Technical terms from the automotive sector? That's exactly what the system was built for.

KENSA captures what is said precisely, structures it automatically and transfers it straight into the system – even when the compressor next door is running at full speed.

Artificial intelligence included

KENSA is more than speech recognition – an AI that understands and structures language. Developed by KENBUN IT AG in Karlsruhe, built on years of experience with digital voice systems since 2018. Already successfully in use with numerous users in demanding environments. This experience is built into KENSA.

How KENSA works

Step 1: Integrate paper forms into the app

Existing paper or PDF forms are embedded into KENSA.

Step 2: Simply speak and the app does the rest!

Employees speak the content into the desired fields and the app fills them in intelligently.

Step 3: Process data further

The captured information is available in structured form for ERP, CRM or maintenance systems and any other downstream systems of your choice, ready for further processing.

Your benefits

Speak instead of type
Hands free on the job

Fewer errors in reports

Works even with noise, dialect & accent

Seamless handover to your systems

Test KENSA now with one of your existing forms

Discover how KENSA makes your documentation processes simpler and more effective!
