

# KENSA

Ready to use instantly,  
no training needed

Speak instead of type,  
hands free on the job

Reliable even with noise,  
dialects and accents

Runs on any device,  
even offline

## Paper instead of productivity: When forms become a bottleneck

The working day is coming to an end. But on the desk there's still a mountain of forms, inspection records and data sheets. Some are hard to read, others incompletely filled in and some contain contradictory information. Yet the data has to be transferred into the system now.

What many companies experience every day costs not only time but also nerves. Instead of doing value-adding work, employees spend hours deciphering handwritten documents, chasing missing information and entering data manually.

### With KENSA, data is captured where it's created

KENSA puts an end to the detour via paper. Information is captured digitally, directly on site, and is immediately available in the system. Handwritten notes, lost forms or faulty transfers are a thing of the past.

Whether tests, checks, inspections or surveys – all data is documented in a structured, complete and traceable way. This eliminates time-consuming rework at the office.

### Artificial intelligence included

KENSA is more than speech recognition – an AI that understands and structures language. Developed by KENBUN IT AG in Karlsruhe, built on years of experience with digital voice systems since 2018. Already successfully in use with numerous users in demanding environments. This experience is built into KENSA.

# How KENSA works

## Step 1:

### **Integrate paper forms into the app**

Existing paper or PDF forms are embedded into KENSA.

## Step 2:

### **Simply speak and the app does the rest!**

Employees speak the content into the desired fields and the app fills them in intelligently.

## Step 3:

### **Process data further**

The captured information is available in structured form for ERP, CRM or maintenance systems and any other downstream systems of your choice, ready for further processing.

## Your benefits

Speak instead of type  
Hands free on the job

Fewer errors in reports

Works even with noise, dialect & accent

Seamless handover to your systems

## Test KENSA now with one of your existing forms

Discover how KENSA makes your documentation processes simpler and more effective!
