

KENSA

Ready to use instantly,
no training needed

Speak instead of type,
hands free on the job

Reliable even with noise,
dialects and accents

Runs on any device,
even offline

When documentation becomes a burden: Tree inspection on paper

The arborist stands in the forest, checking the condition of a tree while at the same time taking measurements, making notes and documenting damage. In one hand they hold measuring instruments, in the other a notepad. The pen slips from their grip and lands in the leaves. What looks like a minor everyday situation reveals a much bigger problem: documentation costs valuable time and distracts from the actual work.

Many tree inspections and tree registers are still carried out on paper forms. Information is noted by hand on site and later re-entered at the office. This process is not only time-consuming but also error-prone.

With KENSA, you document directly at the tree – digital, simple and efficient

KENSA digitises the entire inspection and documentation process. Instead of juggling pen, paper and several devices, arborists capture all relevant information directly on a mobile device using voice input.

Damage, actions, location data, photos and inspection results are documented immediately on site and saved automatically. The data is available centrally right away – with no rework at the office and no media disruptions.

Artificial intelligence included

KENSA is more than speech recognition – an AI that understands and structures language. Developed by KENBUN IT AG in Karlsruhe, built on years of experience with digital voice systems since 2018. Already successfully in use with numerous users in demanding environments. This experience is built into KENSA.

How KENSA works

Step 1: Integrate paper forms into the app

Existing paper or PDF forms are embedded into KENSA.

Step 2: Simply speak and the app does the rest!

Employees speak the content into the desired fields and the app fills them in intelligently.

Step 3: Process data further

The captured information is available in structured form for ERP, CRM or maintenance systems and any other downstream systems of your choice, ready for further processing.

Your benefits

Speak instead of type
Hands free on the job

Fewer errors in reports

Works even with noise, dialect & accent

Seamless handover to your systems

Test KENSA now with one of your existing forms

Discover how KENSA makes your documentation processes simpler and more effective!
