

# KENSA

Ready to use instantly,  
no training needed

Speak instead of type,  
hands free on the job

Reliable even with noise,  
dialects and accents

Runs on any device,  
even offline

## Working at height:

### When documentation becomes an additional challenge

A technician is working high up on a mast, carrying out a technical visual inspection. Their full attention must be on the installation, possible damage and their own safety. At the same time, defects need to be documented, photos taken and inspection results recorded.

In practice, this often means: notes on paper, photos on a separate device and transferring the information into the system later. Every additional step costs time and increases the risk of errors or incomplete documentation.

#### This is where KENSA comes in

KENSA helps technicians capture defects, damage and inspection results digitally, directly during the inspection. All relevant information is documented immediately on site and stored centrally.

Photos, inspection results, comments and recommended actions can be linked directly to the relevant installation. This eliminates time-consuming rework at the office, and the documentation is available instantly.

#### Artificial intelligence included

KENSA is more than speech recognition – an AI that understands and structures language. Developed by KENBUN IT AG in Karlsruhe, built on years of experience with digital voice systems since 2018. Already successfully in use with numerous users in demanding environments. This experience is built into KENSA.

# How KENSA works

## Step 1: Integrate paper forms into the app

Existing paper or PDF forms are embedded into KENSA.

## Step 2: Simply speak and the app does the rest!

Employees speak the content into the desired fields and the app fills them in intelligently.

## Step 3: Process data further

The captured information is available in structured form for ERP, CRM or maintenance systems and any other downstream systems of your choice, ready for further processing.

## Your benefits

Speak instead of type  
Hands free on the job

Fewer errors in reports

Works even with noise, dialect & accent

Seamless handover to your systems

## Test KENSA now with one of your existing forms

Discover how KENSA makes your documentation processes simpler and more effective!
